

ACCELERATOR 28

Program

Accelerator 28 program targets leaders or entrepreneurs wishing to develop their startup in a dynamic and practice-based ecosystem. We aim to develop entrepreneurship especially in Armenia among:

- students from UFAR and other universities,
- women,
- people with disabilities,
- refugees from Nagorno-Karabakh.

There are two clusters depending on the maturity of the project: a 3-month-pre-acceleration program for idea-stage startups and an acceleration program for companies that have already commercialized or industrialized their product / service.

2021

Benefits

Intensive pre-acceleration program

Large network of experienced mentors and experts from the local and international startup ecosystem

Lectures, workshops, sessions

Co-working space with the opportunity of conviviality

Community building with like-minded entrepreneurs and investors

Cost & Investment

The program is fully free of charge.

After active participation in the pre-acceleration program and final pitching, best performed teams will be awarded

"It is much more interesting to work with people who have gone through the same path as the participants of the Accelerator 28, who are ready to share all their experience and skills with us."

Venera Hovhannisyan (SOS team)
